Dear Customer:

In offering our 1927 Gardeners' List, we take pleasure in presenting the photographs of six of our salesmen, whom their many customers will recognize at once.

These men are the backbone of our business, the men whose job it is to see that you get what you want when you want it, and the best of it. They are your representatives as well as ours, and you may be assured that they always have your best interests at heart.

We are constantly at work improving and perfecting our strains of the many varieties we offer, and in order to keep pace with the large volume of business with which we have been rewarded, we have, among other things, just finished building and equipping in Wyoming one of the finest and most up-to-date pea and bean cleaning and storing plants in the United States. You will find a photograph of this new warehouse on the last page of this catalogue.

Our salesmen have been calling on you for many years past and will continue to do so in the future. If we and they have done our parts well, we only ask that you continue to give us your orders, which are always appreciated and carefully filled.

Yours very truly,

F. H. WOODRUFF & SONS

Growing Asparagus Roots

BROCCOLI OR ITALIAN CAULIFLOWER

SPECIAL ITALIAN Heads compact, of a good size, and most certain to head. Pkt., 20c; oz., \$3.00; 1-4 lb., \$12.00; lb., \$40.00.

The cultivation of Broccoli is the same as for Cauliflower which it very much resembles. One ounce will sow a bed 40 ft. square and produce about 2,000 plants.

We wish to emphasize our superior strain of Italian Broccoli. It costs more than some stocks but it has proven to be the best strain and money-maker of any Broccoli on the market and is grown especially for our very critical trade.

BRUSSELS SPROUTS

Culture This delicious vegetable is superior to either Borecole or Spinach. The small cabbage-like heads which grow upon the stem are much improved by a moderate frost. Sow in open ground in June and when the young plants are six inches high they should be transplanted to rich soil, in rows three feet apart and the plants 18 inches on the row.

PARIS MARKET A half dwarf strain, bearing a large crop of handsome hard sprouts. Pkt., 10c; oz., 50c; 1-4 lb., \$1.50; lb., \$4.50.

SELECTED LONG ISLAND GROWN Pkt., 25c; oz., \$1.75; 1-4 lb., \$7.50; lb., \$25.00.

BEETS

LONG SMOOTH BLOOD BEET WINS FIRST PRIZE—The Long Island Experiment Station in 1926 made a very careful trial ground experiment to determine who had the best stocks of Long Smooth Blood Beet. They secured stocks from twelve different sources and gave all the same treatment. Our stock easily won First Place and, excelled over all others in trueness to type, shape and dark red color. Long Island gardeners or others using this type of Beet should plant our strain.

Connecticut grown beet seed has carried off first honors for quality for a great many years. The growing of beet seed is one of our big specialties as we grow annually on our seed farms here at Milford tons of choice selected beet seed. We wish to emphasize in particular our stock of Woodruff's Early Wonder, Detroit Dark Red and Long Smooth Blood.

WOODRUFF'S EARLY WONDER This is an early beet with a dark smooth skin, small tap root, medium sized top and exceptionally dark red color. It matures very evenly. This variety is a very shy seed yielder which makes it cost a little more than other varieties. The seed itself is smaller and therefore a pound goes further. (In ten pound lots \$1.00 per pound). Pkt., 10c; oz., 15c; 1-4 lb., 35c; lb., \$1.25.

CROSBY'S EGYPTIAN Early as Early Wonder but not as smooth or fine colored. Pkt., 10c; oz., 15c; 1-4 lb., 25c; lb., 75c.

EX. EARLY DARK RED EGYPTIAN Early, small top, flat, dark flesh. Pkt., 10c; oz., 15c; 1-4 lb., 25c; lb., 75c.

Early Wonder Beet

CRIMSON GLOBE A late or main crop variety. Globe shape. Dark bronze foliage. Pkt., 10c; oz., 15c; 1-4 lb., 25c; lb., 75c.

ECLIPSE Early variety, small top, medium size, apt to be light in color. Pkt., 10c; oz., 15c; 1-4 lb., 25c; lb., 75c.

EDMUND'S BLOOD TURNIP Summer cropper for winter use. Dark red flesh, large top. Pkt., 10c; oz., 15c; 1-4 lb., 30c; lb., \$1.00.

DETROIT DARK RED The very best main crop sort. Used by Market Gardeners and Canners throughout the country. The roots are uniformly smooth, globe shape and dark red in color both outside and when cut open. Our special stock of this variety is the best that we know how to produce. Pkt., 10c; oz., 15c; 1-4 lb., 30c; lb., \$1.00.

EARLY BLOOD TURNIP A good late summer variety. Pkt., 10c; oz., 15c; 1-4 lb., 25c; lb., 75c.

LONG SMOOTH BLOOD (Extra Fine Stock) A Carrot-shaped Beet for main crop sort. Very dark Red color and tender sweet table Beet. Pkt., 10c; oz., 15c; 1-4 lb., 35c; lb., \$1.25.

Thrashing Beet at Milford

BEET SEED GROWING

To particular gardeners who want something choice for a critical market and large canning companies who are canning large quantities of Beets and must have a beet that will hold its color in the can, it will be interesting to know that we are continually selecting perfect shape beets of our three leading sorts,

WOODRUFF'S EARLY WONDER, DETROIT DARK RED and LONG SMOOTH BLOOD BEET, for the size of the top and shape of the Beet and their color. To test for color,

each beet that goes into our stock seed selection receives a slight gash on the top of the beet, with the knife and if it shows dark red it is accepted and if it shows a light color, it is rejected. It will be interesting to know that a beet is always lighter on the top than anywhere else and therefore if it shows red on the top of the beet its a safe bet its a good beet throughout.

With stock seed as carefully selected as outlined above, you can readily see that our stocks ought to be exceptionally fine.

Snowball Cauliflower

CAULIFLOWER

We recommend our Snowball Cauliflower as the best there is.

SNOWBALL Earliest maturing strain of short-leaved type. It is well adapted for forcing or winter use and is one of the most popular of all sorts, both for the market gardener and home use. Our strain of this selected Denmark grown seed can be relied upon as one of the most satisfactory of all. Pkt., 25c; oz., \$2.50; 1-4 lb., \$8.00; lb., \$30.00.

EXTRA EARLY DWARF ERFURT Similar in general characteristics to Snowball, but not quite so early and somewhat larger in growth. Pkt., 25c; oz., \$2.50; 1-4 lb., \$8.00; lb., \$30.00.

DANISH DRY WEATHER One of the best varieties, especially adapted for growing in dry climates. Pkt., 25c; oz., \$2.50; 1-4 lb., \$8.00; lb., \$30.00.

SIX WEEKS An early sort suitable for forcing or for early summer crop. Pkt., 25c; oz., \$2.50; 1-4 lb., \$8.00; lb., \$30.00.

oz., 15c; 1-4 lb., 35c; lb., \$1.00.

TRUE WATER CRESS Pkt., 10c; oz., 25c; 1-4 lb., \$1.25; lb., \$4.50.

WITLOOF OR FRENCH ENDIVE Our stock is fine and produces large compact heads. Pkt., 10c; oz., 15c; 1-4 lb., 40c; lb., \$1.50.

DANDELION

We wish to emphasize the superior quality of our **ARLINGTON THICK LEAF** Dandelion, both as to quality of the plant, being very thick leaved and stocky which fills up the bushel, and also very high germinating seed. We grow our Arlington Thick Leaf on our own farm here at Milford, and are thereby able to harvest the seed and send the new crop to our customers in time for sowing the same year.

ARLINGTON THICK LEAF Pkt., 15c; oz., 50c; 1-4 lb., \$1.75; lb., \$6.50.

Chantenay

Bagley

CARROT

The superiority of our Chantenay, Bagley, Hutchinson, and Selected Danvers is accounted for by the fact that we are growing all of these stocks on our own land and are selecting our stock seed each year with great care from perfect specimen roots. The Chantenay and Bagley Carrots shown in colors on the back cover of this book are an actual photograph just as they were taken from the ground, and are the type that we are breeding for.

CHANTENAY This splendid carrot belongs to the half-long stump-rooted type, with good girth and consequently makes a heavy tonnage yield, and also a beautiful shaped carrot for bunching at any time after it has made half its growth. We recommend it above all others as a bunching carrot. For its true shape, see cut above. The color is a rich orange red. Pkt., 10c; oz., 15c; 1-4 lb., 40c; lb., \$1.25.

BAGLEY For an exact likeness for shape, see right hand part of the above cut. It has a beautiful red orange color, shows no green around the top of the root, and grows a medium size top. Where the bushel box is used for marketing they will pack very handsomely, as two roots just about cross the box. This variety has seemed to be a very shy seeder, consequently we are always disappointed in our yields, and have to get an extra price for the seed, but it will repay you, if you desire a handsome heavy yielding carrot. Pkt., 10c; oz., 35c; 1-4 lb., \$1.25; lb., \$4.00.

HUTCHINSON Characteristics identical with Bagley, with the exception that it is inclined to grow slightly out of ground,

making the top of some of the carrots somewhat greenish in color. Pkt., 10c; oz., 25c; 1-4 lb., \$1.00; lb., \$3.00.

WOODRUFF'S SELECTED DANVERS A fine stock of the old popular sort. Bred to an even size, and fine color. Pkt., 10c; oz., 20c; 1-4 lb., 60c; lb., \$2.00.

DANVER'S IMPROVED Good second early. Pkt., 10c; oz., 15c; 1-4 lb., 40c; lb., \$1.25.

SCARLET NANTES Finest forcing. Small top, nice shape, deep orange color, with rather small foliage. Pkt., 10c; oz., 15c; 1-4 lb., 40c; lb., \$1.25.

OXHEART OR GERANDE Short forcing variety. Valuable for first early bunching. Pkt., 10c; oz., 15c; 1-4 lb., 35c; lb., \$1.00.

RUBICON HALF LONG Half-long, stump-rooted, fine color. Pkt., 10c; oz., 15c; 1-4 lb., 40c; lb., \$1.25.

IMPROVED LONG ORANGE A long, pointed variety. Heavy yielder, and a good stock carrot. Pkt., 10c; oz., 15c; 1-4 lb., 35c; lb., \$1.00.

ST. VALERY'S INTERMEDIATE Very similar to Long Orange. Pkt., 10c; oz., 15c; 1-4 lb., 35c; lb., \$1.00.

CELERY

Wonderful Celery

An ounce of Celery seed produces 8,000 plants and it takes 20,000 to set an acre. An acre of Celery means such an immense outlay that a few dollars additional in the cost of your seed if you get quality is certainly the best money that one can spend. We cannot very well grow all of the varieties of Celery which we sell but we are growing on our own ranches from selected stock seeds and under our own personal supervision **WONDERFUL**,

GIANT PASCHAL-FROST STRAIN, **EASY BLEACHING**, and **PARIS GOLDEN** and believe you will find our stocks of these varieties superior to any of these you can purchase on the market. Our annual sales on these Celerys run into tons.

Mr. Woodruff:—

Too much praise cannot be given your Woodruff Celery. It is easily protected from farm blight by careful spraying. I have only a half acre garden, but paid my taxes from 1-2 oz. of seed.

WILLIS A. EINKSEN,

WONDERFUL. (Home Grown Seed). Sometimes Called Golden Plume. This is a thick set compact celery attaining exceptional weight. The stalks of Wonderful shown on front cover were grown in East Haven, Conn. and photographed as grown. Note their stocky formation. We have seen twelve stalks that weighed 72 lbs. The ten stalks shown in the above cut weighed 40 lbs. Our stock of **WONDERFUL** has no soft stalks, is high germination and proven seed that was tested last year. We advise all Celery Growers to try this stock liberally. Pkt., 25c; oz., \$2.50; 1-4 lb., \$8.50; 1b., \$30.00.

GIANT PASCHAL—FROST STRAIN This is the finest eating celery known. Crisp, brittle, free from strings and has that nutty flavor which makes every bite taste like more. We are growing our own Paschal Celery from stock seed procured from Mr. Frost of Belmont, Mass. The Frost Stock of Paschal is grown under greenhouse cultivation so that all soft stalks are eliminated and we believe we can give you the choicest strain of Paschal Celery in existence. Pkt., 10c; oz., 50c; 1-4 lb., \$1.50; 1b., \$5.00.

EASY BLEACHING. (Sanford Superb) This is a valuable and comparatively new variety, which follows about two weeks later than Golden Self Blanching. It grows well on both muck and upland, has splendid keeping qualities, and is not as susceptible to blights as some other sorts. We have a very choice strain of Easy Bleaching, and recommend it highly. Pkt., 20c; oz., \$1.00; 1-4 lb., \$3.00; 1b., \$10.00.

CELERY

PARIS GOLDEN SELF BLANCHING. (Old Strain) Plants are stocky and full hearted, making a vigorous growth, and is easily bleached. It is considered a good storage celery. Our stock is the old original strain, as first introduced in France. If you want a quality Paris Golden, we believe we have it. Pkt., 20c; oz., \$1.00; 1-4 lb., \$3.50; lb., \$12.00.

NEW FRENCH GOLDEN This is a recent introduction from France and also has been sold as Paris Golden, thereby making considerable confusion. The stalks of this celery grow very rapidly and are quite tall, but the plant is not as stocky as the Old Strain. It matures very early, thereby giving it a place as a commercial celery, because it is ready to put on the market considerably earlier than any other variety, and is being grown to a considerable extent on that account. Pkt., 20c; oz., \$1.00; 1-4 lb., \$3.50; lb., \$12.00.

WOODRUFF'S BEAUTY This resembles Paris Golden in size, with a stocky large golden heart, brittle in quality. It is one of the easily bleached green sorts. Pkt., 20c; oz., \$1.00; 1-4 lb., \$4.00; lb., \$15.00.

WINTER QUEEN This is a good variety of celery for winter and spring use. Has a very large heart, creamy white and solid. Pkt., 10c; oz., 35c; 1-4 lb., 75c; lb., \$2.50.

COLUMBIA Plants are medium in height, thick ribbed and well hearted. A good celery for winter market. Pkt., 10c; oz., 35c; 1-4 lb., 75c; lb., \$2.50.

BOSTON MARKET This is one of the old favorites in the Boston district. It grows a very stocky heart, and for eating qualities surpasses anything ever grown. We have an exceptionally fine stock of this celery. Pkt., 10c; oz., 35c; 1-4 lb., 75c; lb., \$2.50.

FIRST CAR OF FLORIDA CELERY GROWN FROM WOODRUFF'S WONDERFUL

On Feb. 22nd, 1926, Mr. G. W. L. Smith shipped the first car of Celery from The Sanford Florida section. This was shipped by F. F. Dutton and consigned to the Woodland Company at Baltimore, Md. The shipment was extra fine quality of Woodruff's Wonderful and brought \$3.00 a crate, F. O. B. There were 336 crates in the shipment so that the car brought \$1,008.00.

Mr. Smith told our Southern Representative, Mr. C. H. Lindley that he was greatly pleased with our stock of Wonderful Celery. That it would mature in ten days to two weeks earlier than any other stock he had ever seen.

WHITE PLUME The earliest celery, but it does not have the quality nor appearance of Golden Self Blanching, which follows right after it. Pkt., 10c; oz., 35c; 1-4 lb., \$1.00; lb., \$3.50.

CELERIAC (Turnip Rooted Celery). Giant Smooth Prague. Pkt., 10c; oz., 15c; 1-4 lb., 75c; lb., \$2.00.

You can no doubt buy Celery cheaper than the prices we are quoting; but we believe the care put into the growing of our stocks of Celery seed will make it the cheapest for you to buy in the end.

The writer recently saw some Grand Rapids Lettuce grown from your seed, same was very pure type. Kindly quote on five pounds of your 1925 crop. Also advise if this seed is grown by you personally or is contracted out to some other grower. We can seldom get lettuce seed from the same house that runs two years alike as to purity of strain.

ONION SETS

We have six frost-proof warehouses for the storage of our onion sets, all of them equipped with special cleaning machinery; and we also operate our own onion set farms for the growing of the crops. The seed sown to produce these sets we are growing on our own California seed ranches from bulbs grown from our own pedigreed and selected stock.

This kind of equipment and service has made us the largest retail onion set house in America.

For a real crop of good keeping onions grown from sets, we recommend our Japanese above all others. Some of our competitors will tell you that this or that is just as good, and we ask the question, "Why not buy the Japanese, and buy it from the originator, whose stock has always been the true type?"

We are now operating our own set growing farms. Yes, it is from grower to planter direct.

Harvesting Sets

F. H. WOODRUFF & SONS

Dear Sirs:—

Some weeks ago I wrote you asking you to increase my onion set order for next season. You advised me to write you again about August 1st which I am doing.

Your Mr. Lindley came around so early this Spring that we were unable to determine at that time how many sets we would need next season.

We feel that your sets are the best sets we can buy from any of the seed men. You certainly have them all beat on the set business. Hoping you will confirm this order, we are,

Yours truly

PARSNIP

Parsnips are about one of the easiest of the vegetables to grow. The seed germinates slow and requires a full season to mature. Sow in early Spring up to May 20th.

The roots may be dug and stored in a cool cellar over Winter or they may be left in the ground over the Winter and dug in the Spring. Be sure and grow plenty of Parsnips as they are so easy to grow and very nutritious. We recommend our White Model.

Early White Model

EARLY WHITE MODEL Improved Hollow Crown. About the right length, smooth, snow white, no side roots, very desirable. Pkt., 10c; oz., 15c; 1-4 lb., 40c; lb., \$1.00.

A little Parsley seed will furnish your table with some fine garnishing leaves all Summer and Fall. For the benefit of the critical gardener let us emphasize the high quality of our Hamburg Parsley. This is selected for its long smooth parsnip-shaped roots. We are giving great care to the selection of our stocks of Parsley. Our stocks of Moss Curled are free from plain leaved and very curly indeed.

PEPPERS

We Specialize on Fancy Strains of Pepper

Sweet Mountain

They enter into the manufacture of many condiments, but the largest sale is of the green fruits produced by the larger fruited varieties. Peppers are hot in inverse ratio to their size, the smaller the pepper, the hotter the flavor.

Sow the seed indoors as early as practicable and when the plants are an inch high transplant into boxes or cold frames so that they stand 5 x 5 inches. On mild days give the plants plenty of air to harden them and as soon as all danger of frost is past set outdoors in rows, 2½ ft. apart and 18 inches in the row. One ounce of seed will produce 2,000 plants. 11,000 plants will plant an acre.

PEPPERS (HOT)

HEIFER HORN A very productive pepper of the cow horn shape. Pkts., 10c; oz., 40c; 1-4 lb., \$1.25; lb., \$4.00.

GROWING EQUIPMENT

We grow annually thousands of bushels of pea seed for both the market garden and canning seed trade. Turning to the inside back cover page, you will see a photograph of our latest pea and bean milling and cleaning warehouse, which we built this past Summer in Wyoming. We have trackage for four cars at a time. Our milling capacity is 2,000 bushels a day, and our picking room will accommodate 88 pickers, who work on automatic picking machines. We also show photograph of a gang of men rogueing our seed stock, and a threshing outfit at work in the field. The Wyoming soil is new, virgin soil, in a high altitude, and with proper irrigation and tillage will produce the finest of pea and bean seed.

EARLY SCARLET GLOBE (Special Selected)

We have been selecting our stock seed on this grade of Scarlet Globe for a number of years. The accompanying photograph represents the shape and top that we are striving for. We recommend this radish to market gardeners serving a critical market, as it will always bring the top price. The outer shell has a very attractive bluish green color; the meat is thick and golden orange. Very dry cooker and an excellent keeper, maturing early. We have taken great pains in selecting our Blue Hubbard squash, as it has been difficult to keep the stock from sporting back to the old green Hubbard. We believe our stock today stands absolutely pure. See illustration above. This Blue Hubbard weighed 45 lbs., and there were plenty more like it in the field. SPINACH

Spinach is one of the most palatable and nutritious greens when properly prepared. It should be planted in very rich ground, the richer the better. Sow it in drills, 16 to 20 inches apart and thin it to 4 to 6 inches to get the best results. When sown in the Spring under favorable conditions, the leaves should become large enough for eating in 8 weeks.

ROUND THICK LEAF The old standard thick leaved Spring Spinach. This is a very early spinach and an old favorite with truckers and market gardeners for Spring cutting. Oz., 5c; 1-4 lb., 10c; lb., 20c.

VIRGINIA BLIGHT RESISTANT SAVOY

This is a blight resisting strain of Savoy spinach produced by the Virginia Experiment Station at Norfolk, Va. The type is not thoroughly fixed, but it surely shows a remarkable tendency to resist blight. It goes to seed rather quickly, and we recommend it for sowing in the Fall. Oz., 5c; 1-4 lb., 15c; lb., 35c.

SAVOY LEAF or BLOOMSDALE This is early, hardy and one of the best for market or canning. Grows upright, of medium size, with broad, pointed, dark, glossy green leaves, curled and wrinkled. Oz., 5c; 1-4 lb., 10c; lb., 20c.

Juliana

Re-Selected Savoy

RE-SELECTED SAVOY This is one of the best types of Savoy spinach we have ever seen. Superior to the regular stocks of Savoy on account of its dark green color, early crumpled leaves and the fact that it remains longer in the cutting state before going to seed. Oz., 5c; 1-4 lb., 15c; lb., 30c.

MONSTROUS VIROFLAY Suitable for either Spring or Fall sowing. Leaves thick, broad, and nearly round. Dark color. One of the older types of spinach, on the Thick Leaf order. Oz., 5c; 1-4 lb., 10c; lb., 20c.

JULIANA This is of the Long Season type, having a large, beautiful, crumpled leaf. It has that beautiful, rich, dark green color. Remarkable for its rapid uniform growth and because it stands hot weather without bolting to seed longer than any other sort. Good for either Spring or Fall planting. Oz., 10c; 1-4 lb., 20c; lb., 45c.

LONG SEASON A new and popular variety similar to Bloomsdale, with a broad and larger leaf, less curled, but will stand longer before bolting to seed. Oz., 5c; 1-4 lb., 10c; lb., 25c.

VICTORIA An excellent variety, forming large, exceedingly thick and dark green leaves, slightly crumpled in the center. Plant grows large and compact, maturing in intermediate season. Leaves usually blunt or rounded at the end, seed round. Becomes fit for use nearly as early as other sorts and remains in good condition much longer. Oz., 5c; 1-4 lb., 10c; lb., 25c.

SPINACH

Round Thick Leaf

KING OF DENMARK A rather slow growing spinach, but remains in nice condition from one to two weeks after some varieties have shot to seed. The plant greatly resembles Long Season. Leaves are thick and stand up well after cutting. Oz., 5c; 1-4 lb., 10c; lb., 30c.

WOODRUFF'S SPECIAL HOT WEATHER

Our special hot weather or Summer spinach is the finest Summer spinach we have ever had to offer. Plants grow very compact, upright and brittle. The leaves are thick, crumpled, and solid. It grows considerably quicker than King of Denmark and withstands the hot weather even bet-

ter. Will stand two weeks longer than Savoy before shooting to seed. We strongly recommend this variety for Summer plantings. Oz., 5c; 1-4 lb., 15c; lb., 40c.

NEW ZEALAND This is unlike true spinach in type as it thrives nicely during hot weather, and in almost any soil, rich or poor. The tender shoots are of fine quality, and you can keep cutting them throughout the Summer. Plant becomes very large and spreading with medium sized broad, pointed leaves. Plant 3 or 4 seeds in hills 2 feet apart each way. You can hasten the germination by soaking in warm water for 12 hours. This is a remarkably nice spinach for the home garden, giving you a cutting spinach all Summer. Oz., 5c; 1-4 lb., 15c; lb., 50c.

Woodruff's Hot Weather

This cut shows Woodruff's Hot Weather Spinach in comparison with the ordinary Savoy Spinach (at the left). You will see that the Savoy has shot to seed, with the three rows of our Hot Weather still standing in prime condition for cutting.

FIRST CAR OF FLORIDA CELERY GROWN FROM WOODRUFF'S WONDERFUL

On Feb. 22nd, 1926 Mr. G. W. L. Smith shipped the first car of Celery from The Sanford Florida section. This was shipped by F. F. Dutton and consigned to the Woodland Company at Baltimore, Md. The shipment was extra fine quality of Woodruff's Wonderful and brought \$3.00 a crate, F. O. B. There were 336 crates in the shipment so that the car brought \$1,008.00.

Mr. Smith told our Southern Representative, Mr. C. H. Lindley, that he was greatly pleased with our stock of Wonderful Celery. That it would mature in ten days to two weeks earlier than any other stock he had ever seen.

You will readily understand that grass and field seeds fluctuate a great deal in price, and we cannot issue a catalog good for a year on an article of this kind. Prices quoted here are the ruling prices of January 1, 1927. These prices should be the current prices for the next four months. We shall be pleased to quote you our lowest prices on a quantity of grass seed at any time. It is our aim to have our grass seeds of just as good quality as our vegetable seeds, and while we do not, of course, grow our grass seeds, yet we aim to buy the best. Prices are net cash, f. o. b. Milford, no discount.

GROWING FACILITIES

We have many times called the attention of our customers to the facilities which we have for growing and cleaning our seeds. During the past year we have added another modern and up-to-date pea and bean warehouse, a photograph of which is here shown. This warehouse is located in Wyoming, where there is absolutely new and virgin soil, which with proper irrigation and cultivation we believe will grow some very choice stocks. Every attention will be given to the roguing and selection of our stock seeds, and we believe it will be another link in our strong chain of resources, which will tend to better service and better quality.

WYOMING PEA AND BEAN WAREHOUSE

You will remember that we have growing stations in Vermont, California, Illinois, Maine, Washington, Wyoming, together with our seed farms and main office located here in Connecticut. We have trained men in charge of all these operations, and while the human element always enters into it, we believe that we can reduce errors to the minimum. Consider these facts when placing your order.

LAWN GRASS SEEDS

For Lawns, Golf Links, City Parks, Private Estates

Sow 5 bu. per acre for new lawns. One pound for 200 square feet.

The essentials for a fine lawn are: **FIRST**, a wise selection of seed; **SECOND**, a rich, well drained, soil; **THIRD**, careful preparation of the ground, making it as fine, mellow and smooth as possible; **FOURTH**, sowing it at a time so as to give the young plants a chance to become well established before being subjected to very dry or cold weather or a hot summer sun. From this on, the beauty of the lawn will be entirely dependent upon the care it receives in mowing, rolling, watering, etc.

Much care is used in the selection of the grasses in our mixtures, as some are most luxuriant in the spring, others in summer, and others again in autumn; so a proper combination of sorts is required for that perfect carpet-like lawn throughout the seasons. If sowing the lawn in the spring, sow just as early as possible, while the soil has plenty of moisture. Prepare the surface smooth, sow your grass seed, and rake it in thoroughly. Care should be taken to keep it properly watered. If fall seeding is to be practised, sow early enough to enable the grass to become well established before cold weather. A light top dressing of stable manure placed on in the fall is a great benefit.
